TO WHOM IT MAY CONCERN

Dear Sir/Madam

It is with great pleasure and enthusiasm that I am writing this recommendation letter to KASSAYE SIYUM to approve that he is the best student with CGPA 3.60 in his academic performance as I thought him in our university during his stay for about four year. He is hard worker, polite, cooperative, and skilled student as I evaluated him when I thought in a class and when he participated in different Software project work.

I would like to take this opportunity to recommend him to explain and describe his knowledge, performance punctuality, creativity and potential, as I know him very well during his stay in our University. I thought him many Computer Science courses such as Fundamentals of Programming I, Fundamentals of Programming II, Object Oriented Programming, Structured System Analysis and Design, Object Oriented System Analysis and Design, database management system and advanced database management.

In addition to his potential, performance and skills that I observed when I thought him, I got a chance to know him very well his effort, potential, and cooperative to work a project alone and in-group when I was his advisor for his Senior Project to design and develop Water billing management system.

Therefore, I strongly recommend this candidate without reservation to pursue further studies, and to procure him in any position in your organization or company. I would like to extend my appreciation in advance any support you provided for him.

Sincerely Yours!

Nigussie Teferi
